CITY OF RIVERSIDE – FORMER SEWAGE TREATMENT PLANT, CITY YARD, AND AGRICULTURAL PARK

Dear Mr. Cota:

This will follow up your recent conversations with Mark Adelson of my staff regarding the above-referenced site. As you know, we initially became involved with this site because of concerns that the grading project was impacting a wetland. These concerns have now been addressed.

During this same grading project, the developer encountered a subterranean tank containing a sludge-like substance. Most of this material was transported to the sludge drying beds at the City of Riverside's wastewater reclamation facility for further processing. Subsequent analyses of this material showed that it contained concentrations of PCBs at levels that would classify it as a hazardous waste. As soon as they realized the nature of this material, the City notified us and promptly began removing it, as well as the asphalt and concrete liner, to an approved hazardous waste disposal site. All of the material has been removed from the sludge drying beds and the City has monitored internal piping and treatment processes, as well as the effluent from the plant, and has not detected any residuals. We believe that the City has performed adequate cleanup activities at the wastewater reclamation plant and we have closed our files on this project.

A Site Investigation, dated September 23, 2003 (enclosed) was performed to evaluate the extent of contamination at the former wastewater treatment site. This investigation indicates that, although soil contaminated with PCBs remains at the site, water quality does not appear to be threatened. However, the contaminated soil may pose a health risk. Since the site does not pose a threat to water quality, it appears appropriate that your department should assume lead responsibility for further investigation/cleanup oversight of this site.

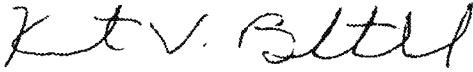

California Environmental Protection Agency

October 29, 2003

Should you have any questions, please feel free to call me at (909) 782-3284, or Gary Stewart of my staff at (909) 782-4379.

Sincerely,

for Gerard J. Thibeault
Executive Officer
